

MAIN FEATURES

- Universal input voltage range (85 – 305 V_{AC})
- Input inrush current limiting
- 750 W rated power (900 W peak for <10 s)
- High efficiency up to 94%
- Single 24 or 48 V_{DC} output voltage available
- Active PFC, EN61000-3-2 compliant (Class C, >25% load)
- Low earth / touch leakage current
- Over temperature, OV, OC and SC protections
- +12 V, 0.3 A; +5 V, 0.72 A Stand-by outputs
- Built-in current sharing and OR-ing for parallel operation and N+1 redundancy
- Remote On / Off signal
- Power good and remote sense signals
- All packages fit 1U applications (1.6" profile)
- ITE safety approval to IEC 62368-1
- Designed to be complied with UL 8750
- RoHS 3 compliant (Directive EU 2015/863)
- 5000 m altitude operation
- PMBus™ digital power-management protocol supported

DESCRIPTION

Rated for IT / Industrial and LED lighting, the DDP1200 UC and PC series of AC-DC power supplies offer increased embedded power in two (2) compact 1U compatible packages, high energy efficiency and wide versatility being optimised for free-air cooling environment.

The series provides a steady 750 W of regulated DC power through 180-305 V_{AC} and 600 W through 85-137 V_{AC} input voltage ranges in a single output of 24 or 48 V_{DC}.

The DDP1200 series come in a U-shaped 1.6" high package (UC) and a variant providing protective vented cage on both AC and DC sides (PC), to facilitate system integration.

By converting AC power at a 94% typical efficiency rate, the DDP1200 series generates very little heat allowing for optimal thermal management.

The series offers a 12 V_{DC}, 0.3 A and a 5 V_{DC}, 0.7 A stand-by outputs and the full set of protection features including high breaking capacity fuses on both AC lines, input under voltage lockout (IUV), output over-current (OC), output short-circuit (SC), output over-voltage (OV) and over-temperature (OT).

The DDP1200 UC and PC series supports digital power management over the PMBus™ communications protocol enabling interoperability with and easy integration into a system. In addition, analogue control signals include Power Good (P_OK), Remote On / Off (+/-PS_Inhibit) and Sense terminals (RS⁺, RS⁻).

Multiple DDP1200 units may be used in parallel mode for redundancy and / or higher power, made possible with the internal OR-ing and current sharing functions.

Being the series conceived and optimised to be operated at free-air cooling environment, therefore without any fan, it is particularly suitable for those environment sensitive to acoustical noise.

The DDP1200 Free Air series complies with the latest IEC/EN/UL 62368-1 safety standard for Audio Video and Information Technologies and was designed to be complied with UL8750.

The DDP1200 Free Air series meets the EN 55032 EMC limits of Class B for conducted and radiated emissions as well as the IEC/EN61000-3 for flicker and harmonics content and the EN 55024, EN 61000-6-2 for EM immunity.

MARKET SEGMENTS AND APPLICATIONS

- Video Wall Display, Entertainment Lighting
- LED Lighting Engine
- Industrial Control System
- Industrial Laser Applications

V1 P_{OUT} to T_{AMB}

PMBus

The DDP1200 does support communication according the PMBus 1.2 protocol via SDA, SCL and #SMBALERT signals as defined in the SMBus Specification version 2.0.

The power supply shall not load the SMBus if it has no input power (SCL & SDA lines should go to High-Z).

The pull-up resistors (2.2 k Ω) for these signals shall be external to the power supply and referenced to an external +3.3V bus voltage.

The DSP circuits inside the power supply are powered by the standby output.

The PMBus is active whatever input power is applied to the power supply or a parallel redundant power supply in the system, provided that their 12V_{SB} are connected in parallel.

Maximum speed of SMBus is 100 kHz.

The ADDR0 and ADDR1 signals, are inputs to the power supply that control the PMBus address assigned to the power supply.

On the system side, the ADDR0 and ADDR1 signals will either be connected to return through a 1 k Ω pull-down resistor or connected to +3.3V external bus voltage through a 1 k Ω pull-up resistor.

The address shall be derived from the logic of this pin as indicated on Outline Drawing and Connections section.

The power supply is a slave only on SMBus device.

For a comprehensive description of DDP1200 PMBus management, do refer to the application note, "AN_MDP-DDP1200 PMBus Mgt_Rev00". Examples of DDP1200 parameters available through communication bus are:

- Input voltage status
- Output voltages +V1 measured value
- Output current on +V1 measured value
- Current sharing status
- Thermal health measured value
- Power-On / Working hours
- Product information
- Status information

Failures shall be reported by PMBus for all failure types:

- Protections failure (OV, OC, OT)
- Voltages out of specification.

BASE SIGNALS / CONTROLS (ACCESSIBLE FROM SIGNAL CONNECTOR P204)

Signal	Notes	Min	Typ.	Max	Unit
+PS_Inhibit (Active High)	Input low voltage ($I_{IN}= 0 \mu A$)	0	-	0.8	V
	Input high voltage ($I_{IN}= 500 \mu A$ at 5.5 V)	2.5	-	5.5	
-PS_Inhibit (Active Low)	V1 disabled when PS_Inhibit is pulled high				
	V1 enabled when PS_Inhibit is floating or low				
5V_{SB} and 12V_{SB}	not affected by PS_Inhibit				
	Input low voltage ($I_{IN}= -800 \mu A$ at 0 V)	0	-	0.8	V
Input high voltage ($I_{IN}= -200 \mu A$ at 2.5 V)	2.5	-	5.5		
(I_{IN}= 700 μA at 5.5 V)	V1 disabled when -PS_Inhibit is pulled low				
	V1 enabled when -PS_Inhibit is floating or high				
5V_{SB} and 12V_{SB}	not affected by -PS_Inhibit				
	Logic level low (<10 mA sinking)	-	-	0.7	V
Power_OK (*) (PS_OK)	Logic level high (200 μA sourcing)	2.4	-	3.45	
Low to high time after V1 in regulation	Power down warning time	150	-	350	ms
		2	-	-	
I_Share	The I_SHARE signals shall be daisy chained among power supplies operating in parallel. On a single power supply operating it provides current measurement on V1 output. On multiple power supplies operating in parallel, it provides current measurement on master V1 output.				
SDA, SCL, #SMBALERT, ADDR0, ADDR1	These are signals which support PMBus communication protocol as specified in the application note AN_MDP-DDP1200 PMBus Mgt_Rev00.				
RSVD RX, RSVD TX	Mainly intended for internal Efore use, these RX and TX signals - available at the output signal connector P204 - may be used to access some DSP functions (monitoring, threshold settings, debug functions). These signals work as an UART Rx/Tx port and can also work as a RS-232 Rx/Tx port by building in the "RS-232 LINE DRIVERS/RECEIVERS" IC				
5V_{SB} Output (**)	Active and in regulation after an $85 < V_{AC} < 305$ is applied Not affected by PS_Inhibit. Available on P204, pin#4	-	-	500	ms
12V_{SB} Output (***)	Active and in regulation after an $85 < V_{AC} < 305$ is applied Not affected by PS_Inhibit. Available on P204, pin#16	-	-	500	ms

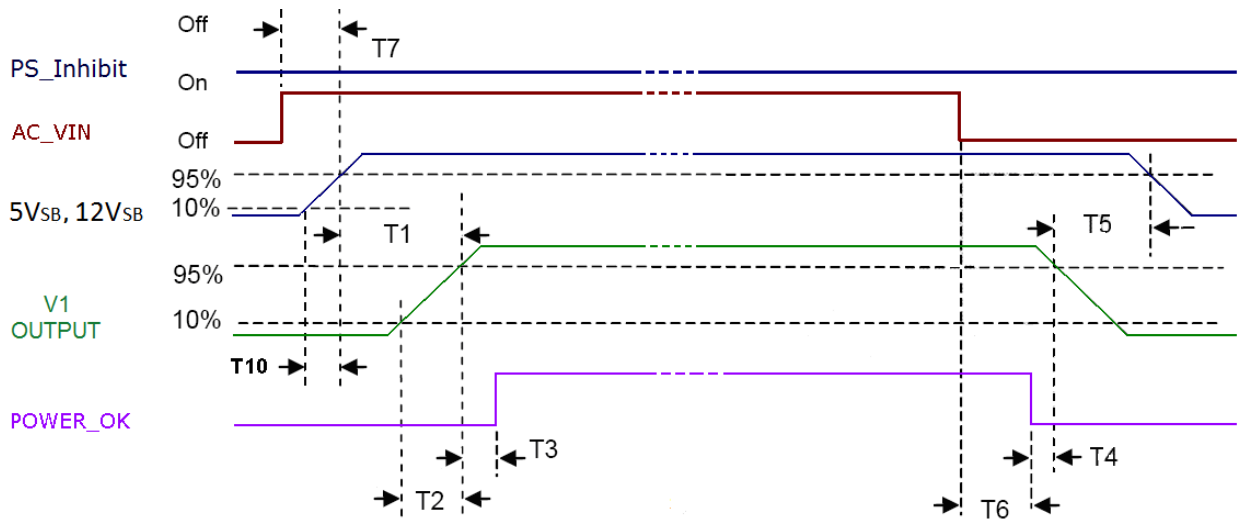

(*) When V1 is On, a P_OK low may indicates V1 under voltage condition. When two DDP1200 operate in parallel, P_OK low in one unit indicates that it is not sharing the expected amount of current (current sharing fault). A 3.3 k Ω internal pull up to a 3.3 V internal reference voltage is used; do not add any other external pull up.

(**) The 5V_{SB} outputs of two or more DDP1200s operating in parallel, cannot be connected in parallel in turn, since doing so results in power supplies damage.

(***) The 12V_{SB} outputs of two or more DDP1200s operating in parallel can be connected in parallel in turn, taking into account that the maximum available power will not be higher of a single operating power supply one.

BASE SIGNALS / CONTROLS TIMING

AC/DC input Off-to-On and On-to-Off timings:

12V _{SB} /5V _{SB} On to V1 On	250 ms ≤ T1 ≤ 1700 ms
V1 rise time	10 ms ≤ T2 ≤ 150 ms
12V _{SB} /5V _{SB} rise time	3 ms ≤ T10 ≤ 150 ms
V1 On – POWER_OK delay	150 ms ≤ T3 ≤ 350 ms
Power down warning	T4 ≥ 2 ms
V1 Off to 12V _{SB} /5V _{SB} Off	T5 ≥ 0.5 s (V1 load > 25 W)
AC Off to POWER_OK low	T6 ≥ 8 ms
AC On to 12V _{SB} /5V _{SB} On	T7 ≤ 500 ms

PS_Inhibit Off-to-On and On-to-Off timings:

V1 rise time	10 ms ≤ T2 ≤ 150 ms
V1 On – POWER_OK delay	150 ms ≤ T3 ≤ 350 ms
Turn-Off warning	T11 ≥ 1 ms
PS_Inhibit – POWER_OK low delay	T8 ≤ 3 ms
PS_Inhibit – V1 On delay	T9 ≤ 1700 ms

OUTLINE DRAWING AND CONNECTIONS –U-CHASSIS + PERFORATED COVERS (-PC)

Overall dimensions: 101.6 x 234.7 x 41.0 mm (4.0 x 9.21 x 1.61 in)

Weight: 1125 g (2.48 lb)

AC INPUT CONNECTIONS		DC OUTPUT CONNECTIONS		SIGNAL CONNECTOR		ADDITIONAL CONTROL FUNCTIONS	
P1: AMTEK TB25C-B02P-13-00A-L M4 GROUND STUD		P200, P201, P202, P203: BRASS M4 THREADED TERMINAL (tight to 0.8-1Nm, max deep screws 7 mm)		P204: MOLEX 501876-1640		SW600, SW601, DL600:	
Ref.	Function	Ref.	Function	Ref.	Function	Ref.	Function
1	Line 1		24V Optional	1	RMT (-)	SW600	V1_ADJ (UP)
2	Line 2		24 / 48V	2	RMT (+)		
3	Protection Earth	P200	+V1	3	I-SHARE	SW601	V1_ADJ (DOWN)
		P201	+V1	4	+5V _{SB}		
		P202	V1 RTN	5	PS_INHIBIT	DL600	Bi-colour LED
		P203	V1 RTN	6	PS_OK		Off
				7	SCL		No AC/DC input power provided
				8	SDA		
				9	#SMBALERT	Blinking Green	Input power good, standby active, V1 inhibited
				10	ADDR0		
				11	-PS_INHIBIT	Steady Green	V1 Active
				12	ADDR1		
				13	RSVD_RX (OUT)	Steady or Blinking red	Power Supply Fault
				14	RSVD_TX (OUT)		
				15	RTN		
				16	+12V _{SB}		

PROTECTION EARTH CONNECTION INSTRUCTIONS

Specifications appearing in ENEDO's catalogues and brochures as well as any oral statements are not binding. All descriptions, drawings and other particulars (including dimensions, materials and performance data) given by ENEDO are as accurate as possible but, being given for general information, and are not binding on ENEDOE. ENEDO makes thus no representation or warranty as to the accuracy of such material. We assume no liability other than as agreed in the terms of the individual contracts and we reserve the right to make technical modifications in the course of our product development. Our product information solely describes our goods and services and is in no way to be construed or interpreted as a quality or condition guarantee. The aforesaid shall not relieve the customer of its obligation to verify the suitability of our Products for the use or application intended by the purchaser. Customers are responsible for their products and applications. ENEDO assumes no liability from the use of its products outside of specifications. No license is granted to any intellectual property rights by this document.
